Installation:	Recessed in matwell or surface-laid with ramping frame.

Description

STRATOS is a primary matting system for specification in commercial applications where the removal of footborne and wheeled-in soilage at entranceways is essential in retail stores, airports, shopping centres, schools and hospitals. STRATOS will withstand heavy and wheeled traffic use.

The matting can be supplied in single width panels of up to 4000mm for a seamless appearance and can easily be supplied to the most demanding design requirement.

The modules may be surface laid or recess fitted as required. All contact strips are easily replaceable for refurbishment purposes.

The wiper material is also available in sheet form as a secondary barrier matting system to complement and coordinate with the STRATOS primary matting system.
