

There are many types of Gym mats with all kinds of finishes and thicknesses for various Gymnasium activities.

The 50mm & 60mm thickness has R 80 foam inside and is available in Poroflex or PVC finish and an anti-slip bottom to prevent movement when in use. Re-enforced corners and connecting elements to create a bigger area are also available.

The 80mm & 100mm thickness has T25 foam inside and is available in Poroflex or PVC finish and an anti-slip bottom to prevent movement when in use. Re-enforced corners and connecting elements to create a bigger area are also available.

The R100 foam can be specified in all the thicknesses for a hard finish if required.

Colours: Blue.
