

- *Sound absorbing, non reflective*
- *Satra tested for slip resistance*
- *Surface or matwell installation*
- *Convenient modular format*
- *Heavy Duty Dual Rubber Rib*
- *100% Natural Rubber Base*
- *Simple no template fitting*

CONCOURSE entrance matting has been specially developed to be used in matwells that are open to the elements i.e. exposed or only partially protected from the weather.

Most entrance matting systems incorporate plastic, carpet or fibre into the design which when saturated with water become ineffective and can cause a slip hazard especially in freezing conditions. Manufactured entirely from natural rubber, CONCOURSE is totally weather resistant and will withstand the harshest of environments. CONCOURSE has been Satra tested to TM144 and offers unparalleled grip in wet weather.

The flexible modules are interchangeable for maximum durability and may be individually replaced to economically extend the wear value of the whole installation.

CONCOURSE rubber entrance matting modules are manufactured to ISO9002 and conform to current BS8300 DDA regulations.

Colours: Black
Temperature Range: -20/+70DegC
Slip Resistance Test: TM144 Satra Tested
Result: High Slip Resistance
