

Terno interlocking tile is a solid 8mm thick Polymer enhanced interlocking Rubber floor tile incorporating a smooth random patterned top profile for easy cleaning and slip resistance.

The feature of the invisible connecting joints is that the geometrical lines and patterns of the rubber floor tile are maintained, whilst still Offering multiple design possibilities. Floors can be created and changed quickly and easily either indoors or outdoors.

Terno interlocking Rubber tiles are ideal for areas of light to medium traffic, or in rooms offering multi purpose use, exhibition halls, storerooms, corridors, school facilities, theatre stages, children's play areas, around swimming pools, patios, balconies or creating temporary floor areas in many environs.

Thickness (mm): 8
Weight/M2 (Kg- Approx): 1.1
Tile size (0.3m x 0.3m): EX STOCK

Colours: Black, Grey, Green, Blue
Hardness: 70Shore A
Tensile: 3 Mpa
Elongation: 150%
Temperature Range: -20/+70DegC
Abrasion Resistance: 400 mm3

MD850 Suretred Terno Interlocking Rubber Tile Performance.

Aesthetically pleasing & decorative.

Very Hard wearing and durable.

Positive grip from multi-directional surface.

Invisible interlocking precision cut edges

Colour Fastness

To sunlight, general cleaning and remedial treatment.
