- *Ultimate durability*
- *Proven track record*
- *100% Recyclable*
- *Open Grid design*
- *Rollable for easy cleaning*

Thruguard is a primary entrance matting system for specification in commercial applications that demand a rugged performance and long term durability.

The **Thruguard** range brings a new vitality to a design concept that has led the market for many years.

Thruguard fall through matting has many infill product choices to compliment the Aluminium scraper bars including Nylon carpet, PVC Brushes, Polypropylene rib carpet and solid rib Rubber.

The choice of indoor or outdoor use with the various infills is almost infinite and is ideal to deal with windblown and footborne moisture incorporating an efficient deep channel grid to entrap the soilage from where it can be simply lifted and removed by vacuum cleaning.

The Thruguard system is bespoke sized and can be made in any shape to fit any shape of matwell including revolving doors half moons ect.

The mat panels do not require to be fixed in place and can be simply lifted for occasional deep cleaning.
