# Tripsafe MD401 Cable Safety Floor Mats

[www.matsdirect.co.uk](http://www.matsdirect.co.uk)

Tripsafe floor safety mats cover trailing wires and cables in an open area for safety. This ensures a safe passage for personnel and help keep the floor area tidy.

Just collect the wires together and lay them flat under the mat and they will be kept in place and reduce the risk of any tripping accidents.

The mat can be run over with light weight trolleys without damage - and being manufactured from rubber will always ensure it will lay flat without a trip hazard being created.

Slips & trips are the most common cause of non fatal injuries in both manufacturing and service industries.

**Colours:** Black/Steel, Black/Blue.
